

PERMANENT EXHIBITION

The main activity of the museum consists of illustrating the history of Romanian oil industry and petroleum science and technology. The contribution of this industrial branch to the economic and social progress of the country is also mentioned.

The subject matters of the museum consist of:

- ❖ History of exploitation and petroleum utilization, laws and rules, social and political events related to;
- ❖ The beginning and evolution of geological investigations;
- ❖ Evolution of tools and techniques for drilling, production and processing.

Based on these aspects, the permanent exhibition was put in place and the museum was inaugurated on the 8th of October 1961.

INDOOR PERMANENT EXHIBITION

The patrimony is displayed in a modern arrangement in a big hall having more than 500 m². Original documents, geological maps, technological documentation, photos and functional small-size copies are some of the most important exhibits.

INDOOR PERMANENT EXHIBITION

OUTDOOR EXHIBITION PARK OF TOOLS

The second exhibition place consists of a *park of tools in the open air* nearby with different equipment used in oil industry over 80 years ago.
